

Progressive help to the operator

UF Control for stationary and Trailer

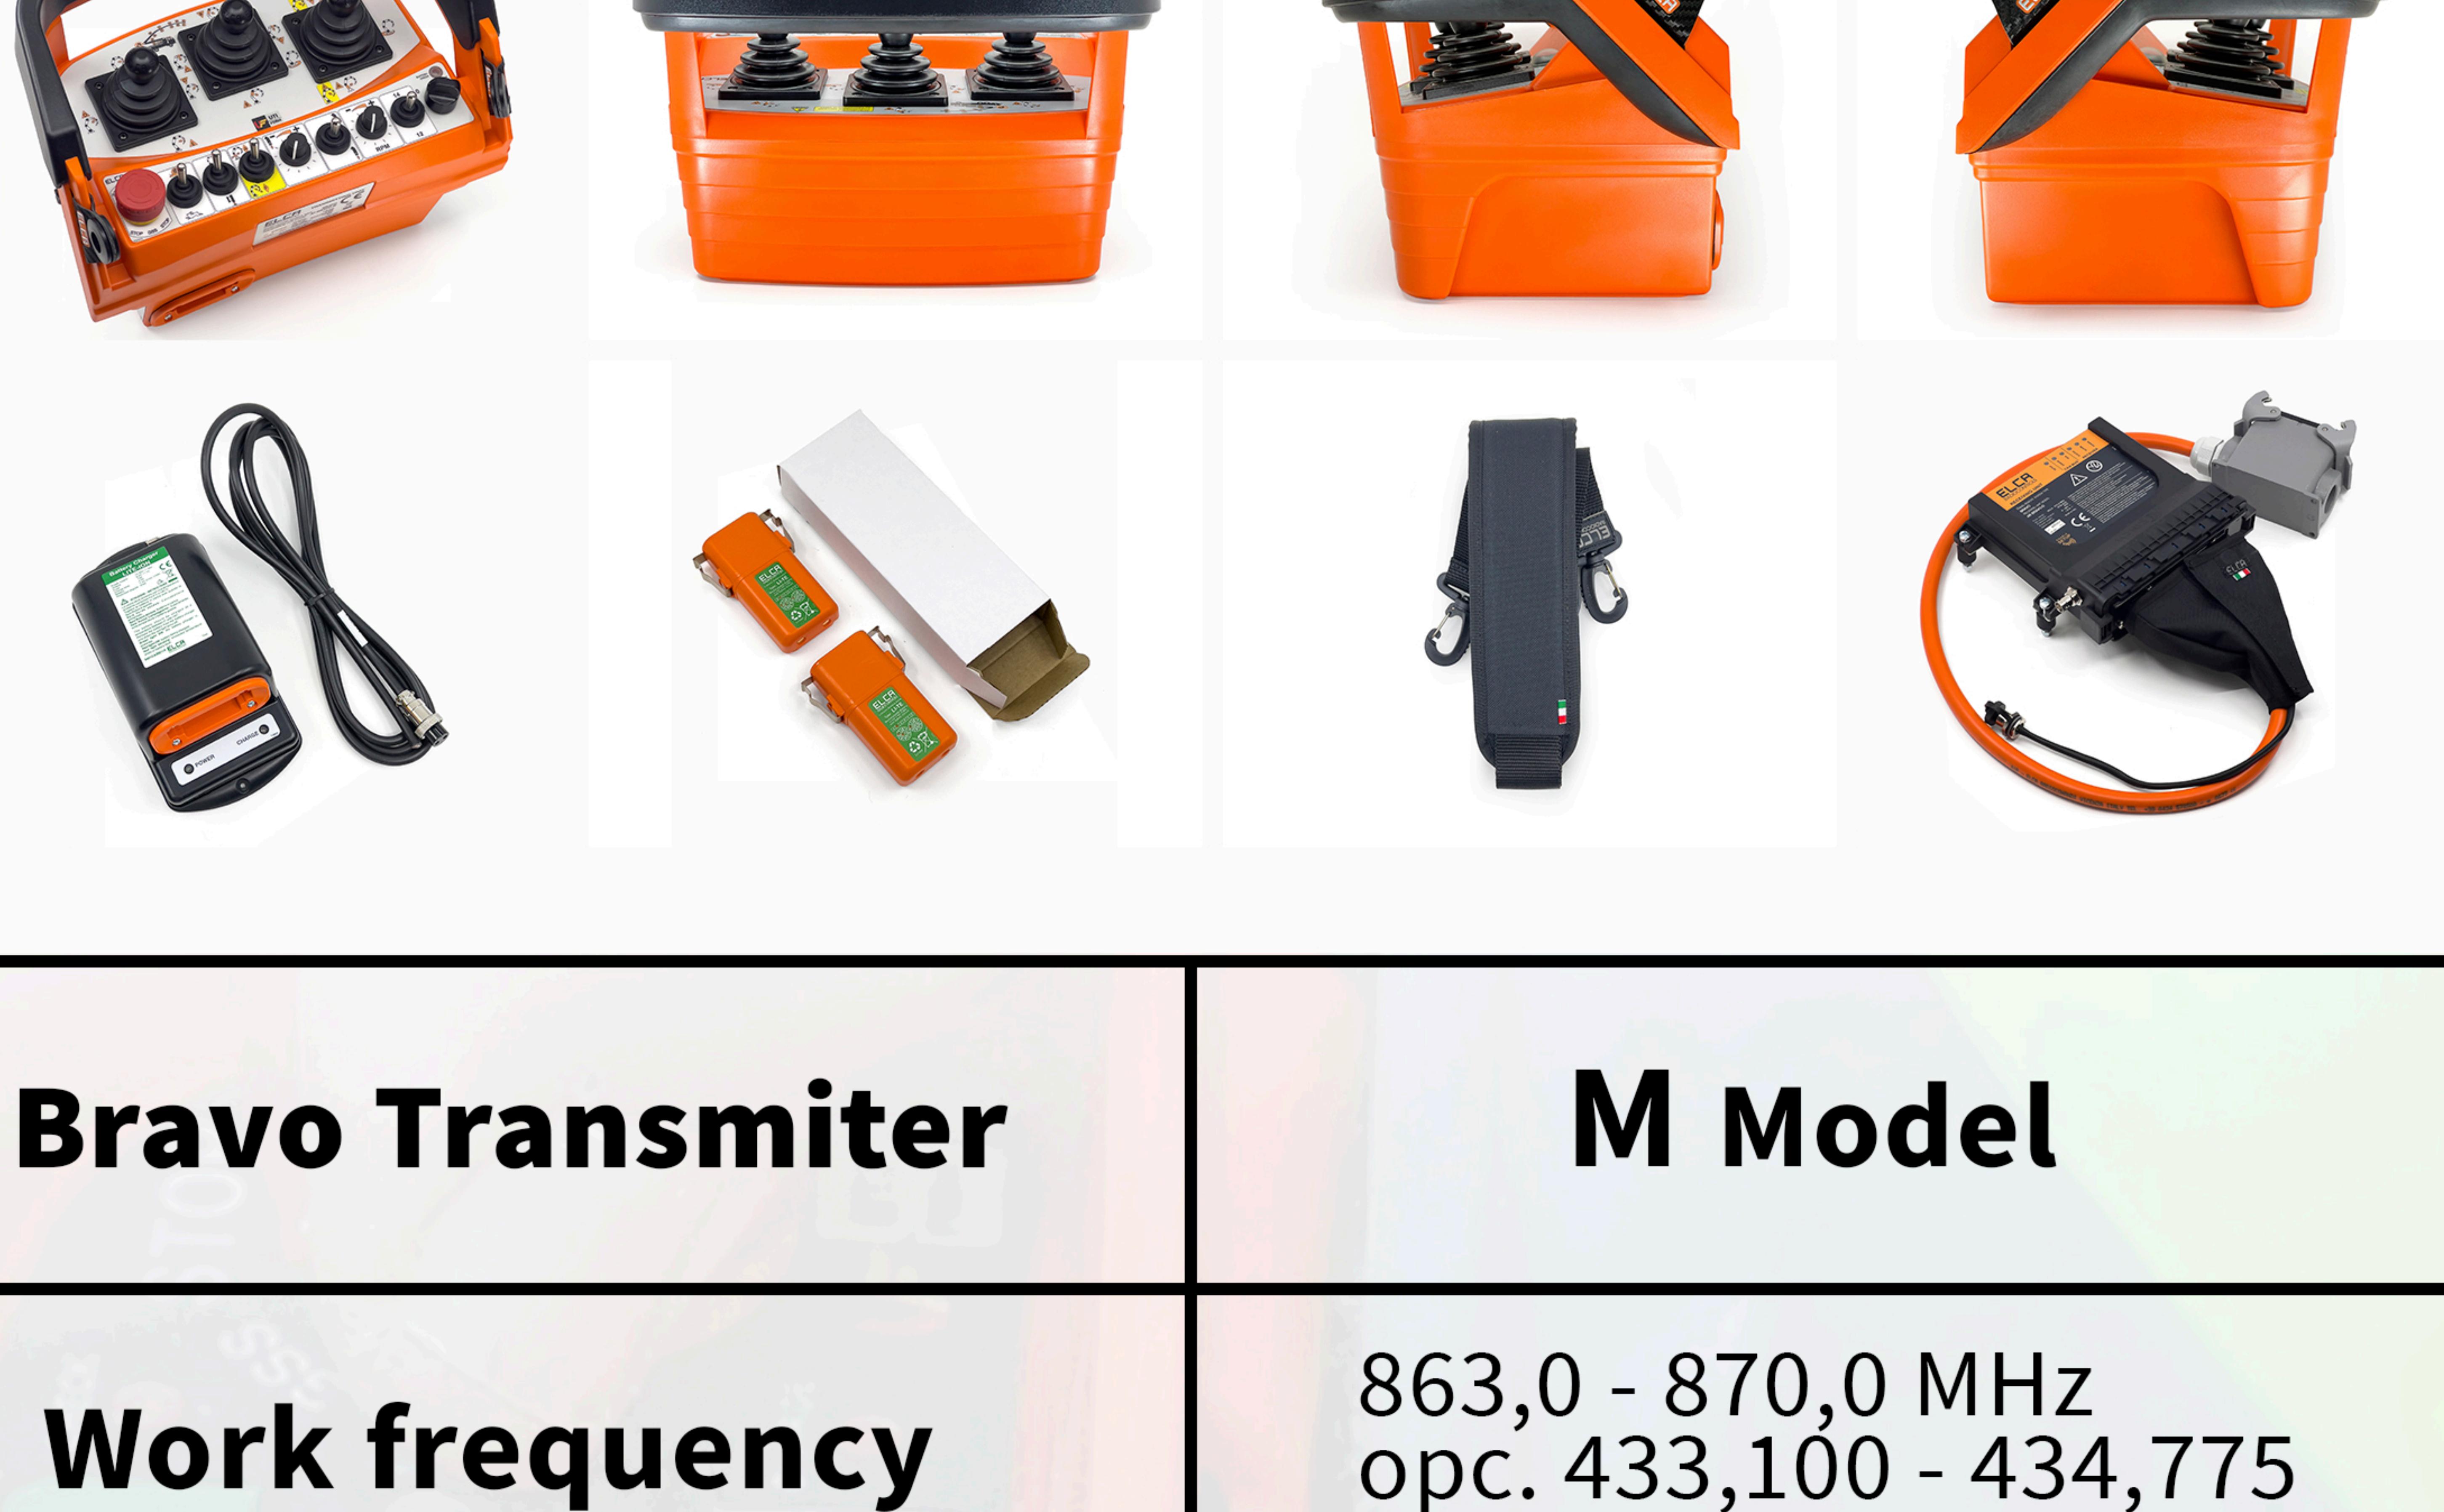

Progressive help to the operator

UF Control, remote controls designed to control the concrete pumps with precision, safety, efficiency and progressiveness.

With a work range up to 150 meters, they allow the operator to move freely on the job site.

They are resistant to dust, water and shocks, including an emergency stop and automatic disconnection for maximum safety. Ergonomically designed, comfortable and easy to use, with two- and three-axis joysticks that allow smooth handling, exact speed and direction of concrete flow, and have long-lasting rechargeable batteries. seamless integration and improve operational efficiency.

UF Control... Total control of your work

Bravo Transmpter

M Model

Work frequency

863,0 - 870,0 MHz
opc. 433,100 - 434,775 MHz

USM band

opc. 921,00 - 928,00 MHz MHz

Power supply

PINC-GEH battery NiNH Sphere, point, M: 7,2 V

Operating temperature

-20 / +60 °C

Working action distance

150m

Emitted power R.F.

RF 868 / 915 MHz <25mW
ERP "auto power tuning"
RF 433 MHz <10mW ERP

Protection level

IP65

Number of available controls

Until:
- 16/24 On/Off
- 16 On/Off + 6 Proportional
- expansion card optional
- communication CAN/Ethernet
