

Diesel screw pump, with a powerful 19 kw STAGE V engine.
Complies with current emissions regulations, established for the European Union.
Easy-to-maintain, engine offering high performance for plastering and self-levelling.
Perfect for continuous pumping of material up to 6mm granulometry.
Easy to clean; due the both direction of rotation, it allows easy removal of plugs.
Maneuverable and easy to transport, due to its compact design.
All our mortar machines can be combined with various accessories to perform more services.

- CE certificate
- Warranty certificate

Simple, robust and very easy to handle.
Multiple applications; pumping, injection, and projection

- . Mixing mortar
- . Plastering bagged mortars
- . Plastering traditional mortars
- . Self-leveling mortar
- . Mortar injection

MORTER VH2

TECHNICAL DATA

	MORTER FAMILY
RENDIMIENTOS	
Model	VH 2
Engine	Diesel Stage V
Power	19 Kw
Pumping distance*	180 mts
Pumping height*	70 mts
Max grain size*	6 mm
Pumping pressure*	* 30 bar
Loading height	800 mm
Hopper capacity	100 L
Mixer capacity	110x63 mm
Dimensions/mm	2500x1300x800
Weight	750 Kg
Sator & rotor size	1L6 ; 2L6

*Depends on consistency, quality and composition of the material, pump model and condition, diameter and length of the transport hose and pumping height of the material.
